

Electives – subjects for preparation:

1. Examples of chemicals in E-300 group (additives in food)
2. Examples of chemicals in E-400 group (additives in food)
3. Examples of chemicals in E-500 group (additives in food)
4. Examples of chemicals in E-600 group (additives in food)
5. Examples of chemicals in E-700 – E-999 group (additives in food)

Students (in 5 groups – one chosen subject per one group) should prepare Power point presentations (about 18 – 25 slides)

Students can find general information about E-groups in last sent presentation (Chemicals in food – part I)

After sending the presentations to dr Iwona Radziejewska, they will be assessed, maybe sent for corrections and after acceptance the credit from Chemistry electives will be given
