

Chemicals in everyday life – are they safe for human health?

Chemistry electives 2020-2021

Subjects for preparation:

- 1. Pesticides, herbicides – the influence on human health.**
- 2. Sweeteners and sugar free food – are they safe for humans?**
- 3. Beneficial chemicals in vegetables and fruit – sulforaphane, lycopene and others.**
- 4. Dangerous chemicals in cigarettes and cigarette smoke – influence on human health.**
- 5. Why fast food is not healthy (from chemical point of view)?**
- 6. Chemicals in cosmetics – which ones are not safe for humans?**

Students can propose also other subjects for preparation

Students should create 6 groups (3-5 persons in one group). Presentation in the chosen subject should comprise about 30 – 40 slides (45 – 60 minutes per one presentation).

The dates for students presentations:

22.04.2021 (Subject 4; students: Hasan, Arian, Vafiollah)

29.04.2021 (Subject 6; students: Hami, Nikol, Jannika, Al-Safi, Manan)

6.05.2021 (Subject 3; students: Adyan, Dhruv, Ama, Rashika, Sarosh)

13.05.2021 (Subject 2; students: Lara, Marlene, Isabelle-Marie, Hannah, Julius)

20.05.2021 (Subject 5; students: Sachin, Deepanshu, Sanskruti, Ahamed)

27.05.2021 (Subject 1; students: Peter, Ibanez Ane, Elisa Ochoa, Nya Tchaptched)
