- ✓ USA w obszarze: Zdrowie, zmiany demograficzne i dobrostan w projektach badawczo-innowacyjnych dofinansowane jak kraje członkowskie: Work Programme 2014-2015:

„ In recognition of the opening of the US National Institutes of Health's programmes to European researchers, any legal entity established in the United States of America is eligible to receive Union funding to support its participation in projects supported under all topics in calls under the Societal Challenge 'Health, demographic change and well - being'”

http://ec.europa.eu/research/participants/portal/doc/call/h2020/common/1632648-part_8_health_v2.1_en.pdf

„1. Switzerland is partially associated to Pillar 1 from 15 September 2014 till 31 December 2016.

This partial association ...**ERC grants, Marie Skłodowska-Curie Actions, Future and Emerging Technologies (FET) and Research Infrastructures, from 15 September 2014 (i.e. calls with a deadline between 15 September 2014 and 31 December 2016).** Researchers in Switzerland are also able to participate as associated partners in the programme section on Spreading Excellence and Widening Participation. As associated partners, researchers in Switzerland will again receive direct funding from the EU.

2. Swiss participation as third industrialized country in pillar II and III

In calls in Pillars 2 and 3 of H2020 Swiss partners can still join European collaborative projects, even as coordinators. However they will not be entitled to any direct funding from the EU for their part.

There are two exceptions: SME instrument: no funding; access to risk finance: no access.

Important: Having a Swiss partner in the consortium is in no way a disadvantage”

International cooperation "Open to the world"

Horizon 2020 is **Open to the World**. This means that participants from all over the world, regardless of their place of establishment or residence, can participate in most of the calls of Horizon 2020. Furthermore, in many cases, the EU will fund at least partly the participation of the international partners (see below).

Funding Opportunities

H2020 ONLINE MANUAL

Find the European Union funding opportunities and search for new or closed calls, grouped by the following programmes:

Horizon 2020 - EU research funding from 2014
Seventh Framework Programme (FP7)
Competitiveness and Innovation Framework Programme (CIP)
other research and innovation programmes

Horizon 2020

COSME

Programme for the Competitiveness of Enterprises and SMEs (COSME) will run from 2014 to 2020, with a planned budget of €2.3bn. It will facilitate SME access to finance, create supportive environment for business creation, help small businesses operate outside their home countries and improve their access to markets.

Opening Date	30-07-2014	Deadline Date	21-04-2015 17:00:00 (Brussels local time)
Publication date	11-12-2013	Main Pillar	Societal Challenges
Total Call Budget	€104,500,000	OJ reference	OJ C 361 of 11 December 2013
Status	Open		

Topic: [Advanced ICT systems and services for integrated care](#) **PHC-25-2015**

[Topic Description](#)[Topic Conditions & Documents](#)[Submission Service](#)

Specific challenge: Research on new models of care organisation demonstrates that advanced ICT systems and services may have the potential to respond to, amongst others, the increasing burden of chronic disease and the complexity of co-morbidities. **problem, dlaczego potrzebne jest działanie?** and care systems.

One challenge in re-designing health and care systems is to develop integrated care models that are more closely oriented to the needs of patients and older persons: multidisciplinary, well-coordinated, anchored in community and home care settings, and shifting from a reactive approach to proactive and patient-centred care.

Jak czytać program pracy?

Scope: Proposals should go beyond the current state of art in tele-health and tele-care systems by developing new approaches for integrated care supported by ICT systems and services. Proposals should address barriers from technological, social and organisational points of view in the following domains:

sprecyzowanie ogólnego celu i określonego działania w projekcie

- Development of robust, privacy compliant, accurate and cost-effective systems that facilitate monitoring of
- Factory analysis and interpretation of patient and care provider data, to improve decision making among formal and informal care givers and patients;
- Multi-channel and multi-actor interaction and exchange of knowledge in integrated care settings, across digital collaborative platforms;
- Development of patient-oriented services to support patient empowerment, self-care, adherence to care plans and treatment at the point of need;
- Development of new patient pathways, new training programmes for the care workforce and new organisational models to improve the coordination of care services as well as the skills and collaboration of health professionals, social carers and informal care givers;

Expected impact:

- Reduced admissions and days spent in care institutions, and improvements in the daily activities and quality of life of older persons through effective use of ICT and better coordination of care processes.
- Strengthened evidence base on health outcomes, quality of life and care efficiency gains from the use of ICT in

oczekiwane kluczowe rezultaty projektu, jakie mają zostać osiągnięte; odbiorcy

- care services.
- Improved interaction between patients and their carers, and more active participation of patients and their relatives or other informal care givers in care processes.
- Improved usability and adaptability of ICT systems for integrated care, taking account of the complex relationship between digital technologies and their social and human context of application.
- Reinforced medical knowledge with respect to management of co-morbidities.
- Strengthened European industrial position in ICT products and services by measurable indicators such as new business areas, start-ups and protected intellectual property
